Stanwell - Reviewer's Badge: I'm a musician who started taking advantage of digital music file formats to replace the analogue formats I used to use. In my music collection I had to be able to backup MP3, WMA, WAV, and FLAC files because of my digital recorder. I found that all those file formats are capable of a much wider range of compression than I was able to get with my tape recorder. There's a lot of free software out there that will allow you to convert from one format to another. Since there's a lot of choice, I thought I'd compile a list of all the software I found, and I will keep adding to the list over time. What's New in this Version: * Improved support for Windows 10!* Improved compatibility with Windows 10 and Mac OSX* Fixed some bugs Requirements: * Windows Vista/Windows 7/Windows 8/Windows 8.1* Mac OSX 10.7 or later
